

Task 2

Deploy a Virtual Machine & Install Web Server

Objective

Launch an Ubuntu EC2 instance and configure Apache web server to host a custom webpage.

Services Used

- Amazon EC2
- Ubuntu Server 26.04 LTS
- Apache2 Web Server

Steps Performed

1. Created an EC2 Ubuntu instance.
2. Configured security group with SSH and HTTP access.
3. Connected to the instance using EC2 Instance Connect.
4. Installed Apache web server.
5. Enabled Apache service.
6. Created a custom webpage displaying "Hello from Cloud VM".
7. Accessed the webpage using the public IP address.

Commands Used

```
sudo apt update
sudo apt install apache2 -y
sudo systemctl enable apache2
echo "<h1>Hello from Cloud VM</h1>" | sudo tee /var/www/html/index.html
```

Public IP

13.200.250.242

Outcome

Successfully deployed an Ubuntu virtual machine and hosted a custom webpage accessible through the public IP address.
